## SECTION 4: ENVIRONMENTAL IMPACT ANALYSIS

---

### Environmental Topics

---

This DEIR provides analysis of all environmental topics presented in the CEQA Guidelines. The following sections present an examination of the potentially significant environmental consequences associated with implementation of the proposed project:

- |                                     |                             |
|-------------------------------------|-----------------------------|
| 4.1 Aesthetics                      | 4.10 Mineral Resources      |
| 4.2 Agricultural Resources          | 4.11 Noise                  |
| 4.3 Air Quality                     | 4.12 Population and Housing |
| 4.4 Biological Resources            | 4.13 Public Services        |
| 4.5 Cultural Resources              | 4.14 Recreation             |
| 4.6 Geology and Soils               | 4.15 Transportation         |
| 4.7 Hazards and Hazardous Materials | 4.16 Utilities              |
| 4.8 Hydrology and Water Quality     | 4.17 Global Climate Change  |
| 4.9 Land Use and Planning           |                             |

---

### Organization of Issue Areas

---

Sections 4.1 through 4.16 discuss the environmental impacts that may result with approval and implementation of the proposed project.

Each environmental issue area in Sections 4.1 through 4.17 include:

1. The environmental setting as it relates to the specific issue;
2. The regulatory framework governing that issue;
3. The methodology used in identifying the issues;
4. The significance criteria;
5. An evaluation of the project-specific impacts and identification of mitigation measures; and
6. A determination of the level of significance after mitigation measures are implemented.

---

### Level of Significance

---

Determining the severity of project impacts is fundamental to achieving the objectives of CEQA. CEQA Guidelines § 15091 requires that decision-makers mitigate, as completely as is feasible, the significant impacts identified in the EIR. If the EIR identifies any significant unmitigated impacts, CEQA Guidelines § 15093 requires decision-makers in approving a project to adopt a statement of overriding considerations that explains why the benefits of the project outweigh the adverse environmental consequences identified in the EIR.

The level of significance for each impact examined in this DEIR was determined by considering the predicted magnitude of the impact against the applicable threshold. Thresholds were developed using criteria from the CEQA Guidelines and checklist; state, federal, and local regulatory schemes; local/regional plans and ordinances; accepted practice; consultation with recognized experts; and other professional opinions.

---

## Format Used for Impact Analysis and Mitigation Measures

---

The format adopted in this EIR to present the evaluation of impacts is as follows:

### Summary Heading of Impact

<b>Impact 4.1-1</b>	<p>An impact summary heading appears immediately preceding the impact description (Summary Heading of Impact in this example).</p> <p>The impact number identifies the section of the report (4.1 in the example) and the sequential order of the impact (1 in the example) within that section. To the right of the impact number is the impact statement, which is quoted from the CEQA Guidelines' Appendix G, Environmental Checklist (Checklist).</p> <p>[CEQA <i>Environmental Issue Name</i> Threshold X(x)] This line cites the issue name and threshold number from the Checklist.</p>
---------------------	---

---

### Impact Analysis

A narrative analysis follows the impact statement.

### Significance Before Mitigation

This section states the level of significance of the impact before any mitigation is proposed.

### Mitigation Measures

In some cases, following the impact discussion, reference is made to state and federal regulations and agency policies that would fully or partially mitigate the impact. Also, policies and programs from applicable local land use plans that partially or fully mitigate the impact may be cited.

Project-specific mitigation measures, beyond those contained in other documents, are set off with a summary heading and described using the format presented below:

<b>AG 1</b>	<p>Project-specific mitigation is identified that would reduce the impact to the lowest degree feasible. The mitigation number links the particular mitigation to the environmental issue area it is associated with (AG for Agriculture in this example); the number identifies the sequential order of that mitigation for that impact (1 in this example).</p>
-------------	---

### Significance After Mitigation

This section identifies the resulting level of significance of the impact following mitigation.
