Riverside, CA 92502-0789

Project: Public Safety Enterprise Communication (PSEC) Project

Dear Ms. Mitchell:

The Mojave Desert Air Quality Management District (MDAQMD) has received the Notice of Preparation for a Draft Program Environmental Impact Report for the PSEC Project. This project would expand the County of Riverside's radio tower network from the current 20 sites to approximately 70 sites throughout the County. Some sites would be located outside the County including sites in San Bernardino, San Diego and Orange counties. The sites would be composed of a steel tower, and equipment building, and necessary electrical and road access.

If the proposed project sites located within the boundaries of the MDAQMD include a 50 HP or larger generator, the MDAQMD recommends that the County of Riverside require the submission of applicable permit applications and the associated application and permit fees to the MDAQMD as a condition of approval.

Thank you for the opportunity to review this planning document. If you have any questions regarding this letter, please contact me at (760) 245-1661, extension 6726, or Tracy Walters at extension 6122.

Sincerely,

A handwritten signature in black ink, appearing to read "Alan J. De Salvia". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Alan J. De Salvia
Supervising Air Quality Engineer
