COMMENTS: This is in response to the proposed communication tower in my neighborhood. I am against the tower being erected in our residential neighborhood. It will affect the view from my house, as it is in my direct line of sight. Also, we already have received several planning changes from the County of Riverside which affect the property value of our house. The planned density of buildings in our immediate surroundings have increased tremendously. So, rather than add the tower to our residential community, please locate it somewhere else where it will not have such a negative impact. Sincerely, Terri Love, Homeland
