Subject: PSEC Project

1. In reading your draft, Table 1:Proposed Site information, site name Rancho Carrillo, you use the notations, Candidate B and Candidate E. What is the significance of these designations? Which ones are Candidates A, C, and D?
2. Is Rancho Carrillo-Candidate E on a residential lot?
3. On page 13, you submitted 4 examples of communications towers. What are the heights of each?
4. What would be the areas not covered if the locations at Rancho Carrillo are not obtained. What percentage of total expected coverage area would that represent.
5. What are the alternatives you have explored that would achieve your goals and not use either of the Rancho Carrillo sites?
6. Has the U.S. Forrest Service approved any sites?
7. In your attached colored flyer the Homeland Security emblem is included. Is this a Federal project and what influence will they have in dealing with U.S.F.S.?

Thanks,

Dan Felix
