COMMENTS: I am strongly in favor of the Public Safety Enterprise Communication Project as a whole as it will significantly improve communications and interoperability for police agencies, County Sheriff Department and County Fire. I have a specific request for one particular site, Vaquero. This is identified as a Build Type A facility. There is already on large lattice towre and an existing wood pole on the site. The designers should be tasked with thoroughly investigating the ownership and use of the existing tower and pole. If technically feasible, County facilities should be co-located on the existing tower and/or pole without constructing an additional tower.

ADDRESS: 44475 Calle Vista Lejos
