This email came in on Friday from Brian Marines at the Metropolitan Water District of Southern California. He had some GIS requests & wanted to request an extension on time of the NOP.
Thanks, Vikki

Subject: PSEC project

Hello Ashley,

I am reviewing the NOP for the Public Safety Enterprise Communications (PSEC) project. The public notice gave a detailed table of the proposed locations that indicated approximately 4 Metropolitan Water District of Southern California properties. We would like to review the other location sites listed on the NOP against our map to decide whether Metropolitan may have other interests (facilities, mitigation areas, etc.) in the area.

The internet link given on the NOP did not include GIS downloads for mapping. Do you have an original GIS shapefile that I may have to expedite our review and accurately assess these locations?

In addition, given the holiday on Monday (Cesar E. Chavez day) and the numerous project sites for review, Metropolitan would like an extension to comment on this NOP.

Thank you for your consideration,

Brenda S. Marines
